Houston, TX, United States

Research Interests

- My research spans agentic AI, medical world models, and efficient visual perception. I focus on evidence-grounded reasoning, action-aware simulation, and tool-using clinical workflows, with an interest in vision-language-action (VLA) systems for embodied medical AI.

Education

- **University of Alabama at Birmingham** — *Jan 2024 – May 2025*
  Ph.D. in Computer Science — Birmingham, United States
- **Bowling Green State University** — *Aug 2019 – Dec 2023*
  Ph.D. student in Data Science — Bowling Green, United States
- **Bowling Green State University** — *Aug 2018 – Jul 2019*
  Master of Science in Analytics — Bowling Green, United States
- **Bowling Green State University** — *Aug 2014 – Jun 2018*
  Bachelor of Science in Business Analytics and Intelligence — Bowling Green, United States

Research & Project Experience

- **University of Texas Health Science Center at Houston [🌐]** — *May 2025 – present*
  Postdoctoral Research Fellow (mentor: Dr. Xiaoqian Jiang) — Houston, TX, United States
  - **Medical world models:** Co-developed a capability and SATO-V evidence framework for medical world models, distinguishing action-conditioned simulation, counterfactual reasoning, and model-based planning in a survey submitted to TMLR.
  - **Agentic medical AI:** Developed ClinAgent, an agentic medical-imaging research platform that orchestrates brain segmentation, longitudinal analysis, and evidence-linked reporting in a unified workflow for physician review.
  - **Neuroimaging AI infrastructure:** Built complementary resources: BrainTRACE evaluates evidence-grounded MRI reasoning on **7,273 scored questions**, and OpenBrain supplies **35,838 cases** with generated segmentation labels, provenance, and quality scores.
  - **Efficient medical imaging:** Developed compact 3D segmentation through distillation, achieving **93.7% fewer parameters** and **3.0× CPU inference speedup** while retaining **98.7% of teacher Dice** on Mindboggle-101 (npj Health Systems).
  - **Autonomous agentic workflows:** Co-developed execution-guided workflow generation in ComfySearch, surpassing ComfyMind by **7.5 percentage points** (**71.5% task completion** on 200 ComfyBench tasks), alongside difficulty-aware multi-agent orchestration in DAAO.
- **UAB & Bowling Green State University (BGSU)** — *Aug 2021 – May 2025*
  Research Assistant (Advisor: Dr. Qing Tian) — United States
  BGSU: Aug 2021 – Jan 2024 UAB: Jan 2024 – May 2025
  - **Efficient visual perception:** Developed adaptive teacher-student attention for distillation (ACAM-KD), raising RetinaNet-R50 by **3.8 mAP on COCO 2017 val** over the undistilled student without adding inference-time computation.
  - **Transformer detection for driving scenes:** Developed context- and location-aware transformer distillation (CLoCKDistill), boosting DINO-R18 by **6.4 AP points** (56.1 to 62.5 COCO-style AP on KITTI) at unchanged inference cost.

Technical Expertise

- **Modeling:** PyTorch, nnU-Net; distillation, 3D segmentation, transformer detection.
- **Agent systems:** Tool orchestration, execution feedback, model routing; Python, FastAPI, React.
- **Evaluation:** Multimodal benchmarks, longitudinal MRI, dataset provenance, reference-free QC.
